

Title: Demonstrate free hosting with control panel

Objective: To set up and manage a website using a free web hosting service that includes a control panel, allowing for basic web hosting capabilities without financial investment.

Theory: □ **Free Hosting Services:**

- **Theory:** Free hosting services are provided at no cost, often supported by ads, limited resources, or lower performance compared to paid hosting options. They offer a way for individuals or small projects to have an online presence without incurring costs.
- **Output:** A functional website hosted on a free server with limitations in resources and features.

□ **Control Panel:**

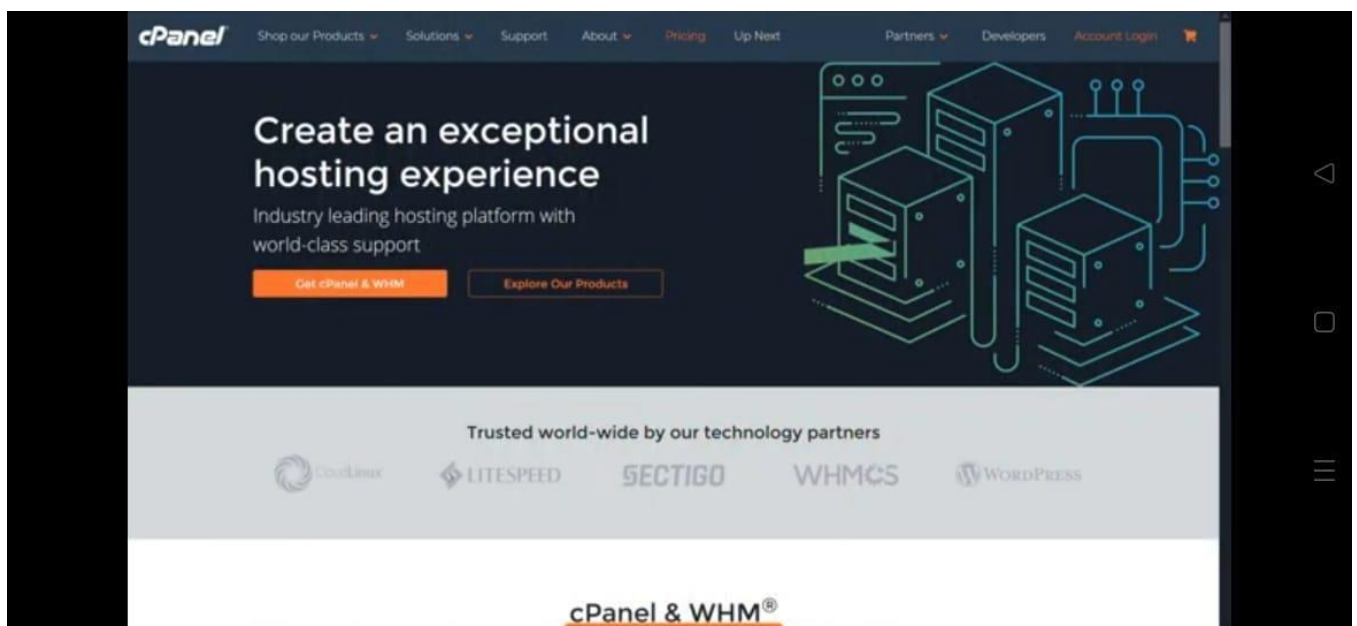

- **Theory:** A control panel provides a graphical interface for managing web hosting services. It simplifies tasks such as file management, domain management, database setup, and application installation. Control panels abstract complex server management tasks into user-friendly tools.
- **Output:** An accessible interface for performing web hosting tasks efficiently without requiring deep technical knowledge.

Lab Task:

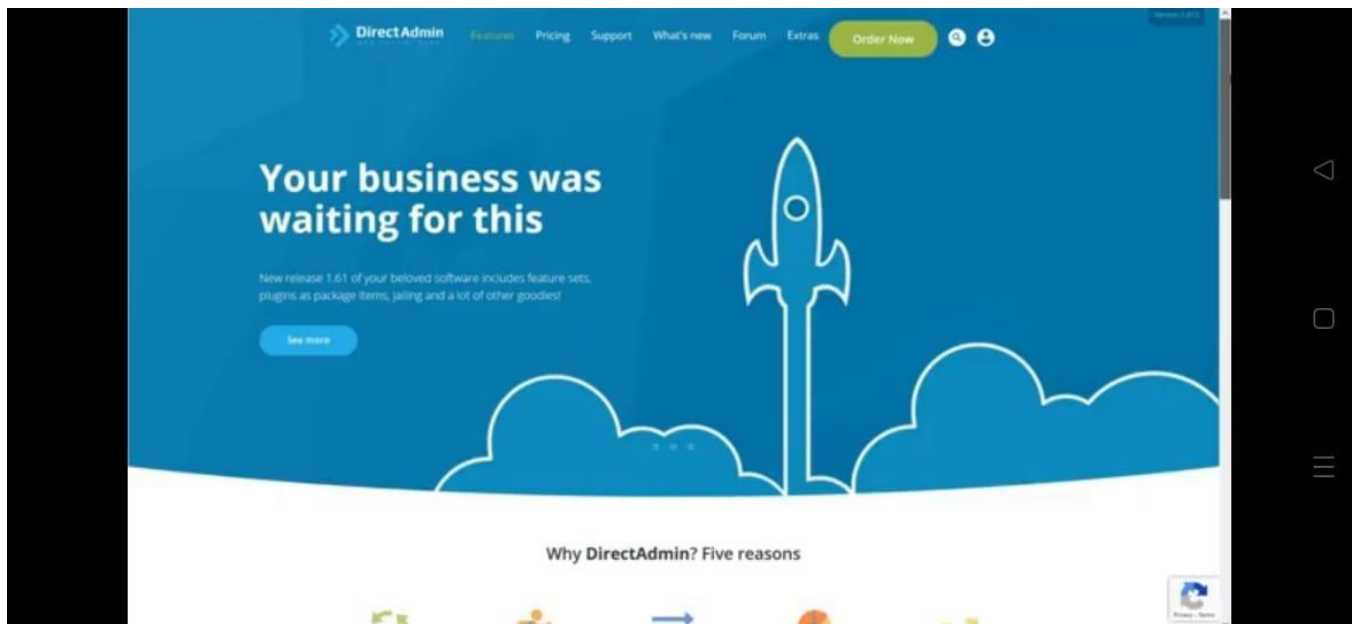

Step 1: search on google chrome 000webhost

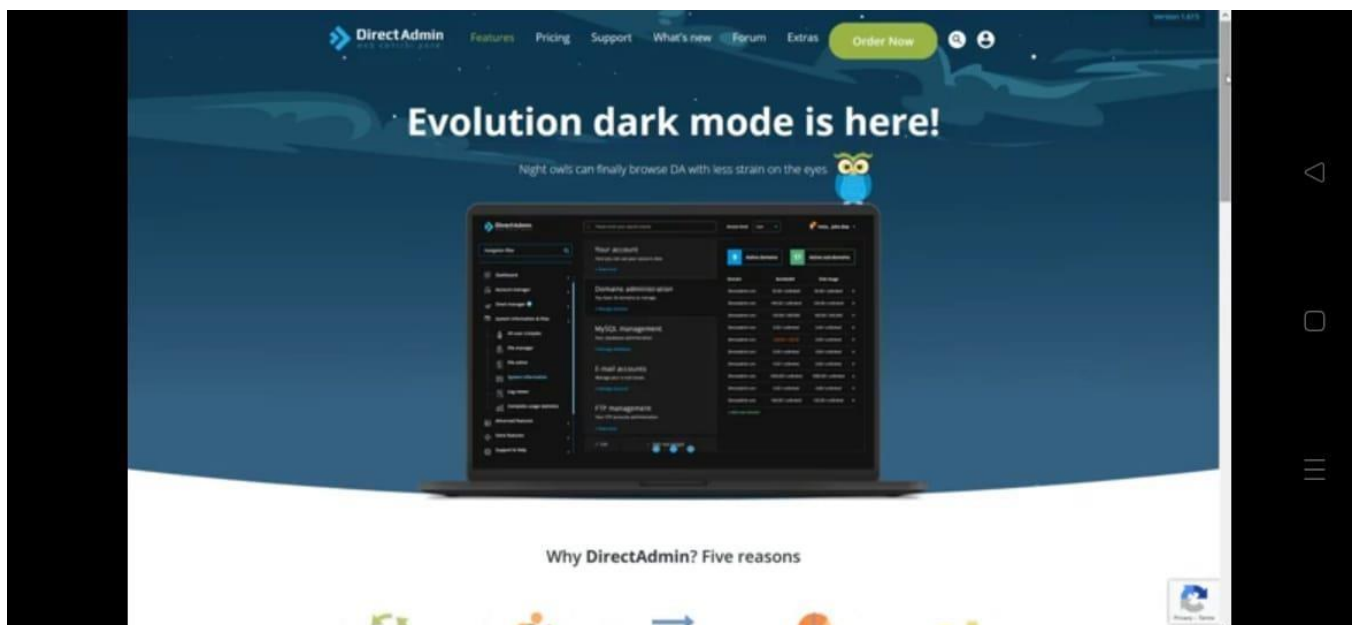

Step 2:

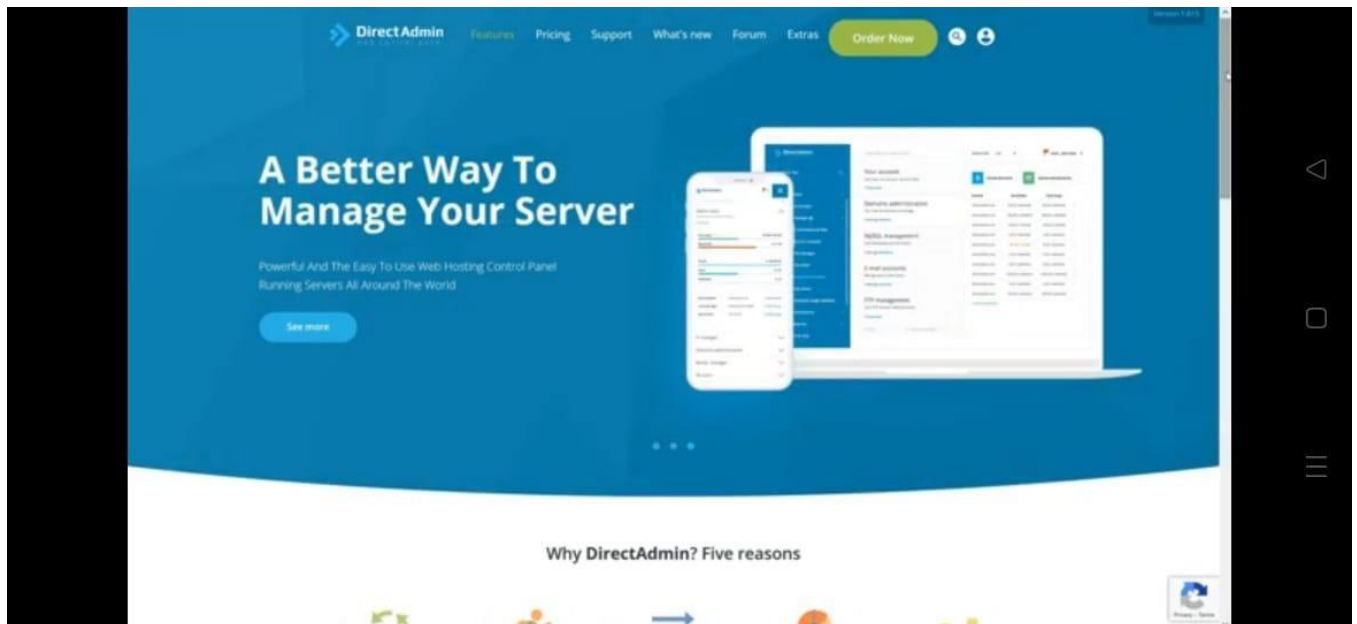

Step 3:

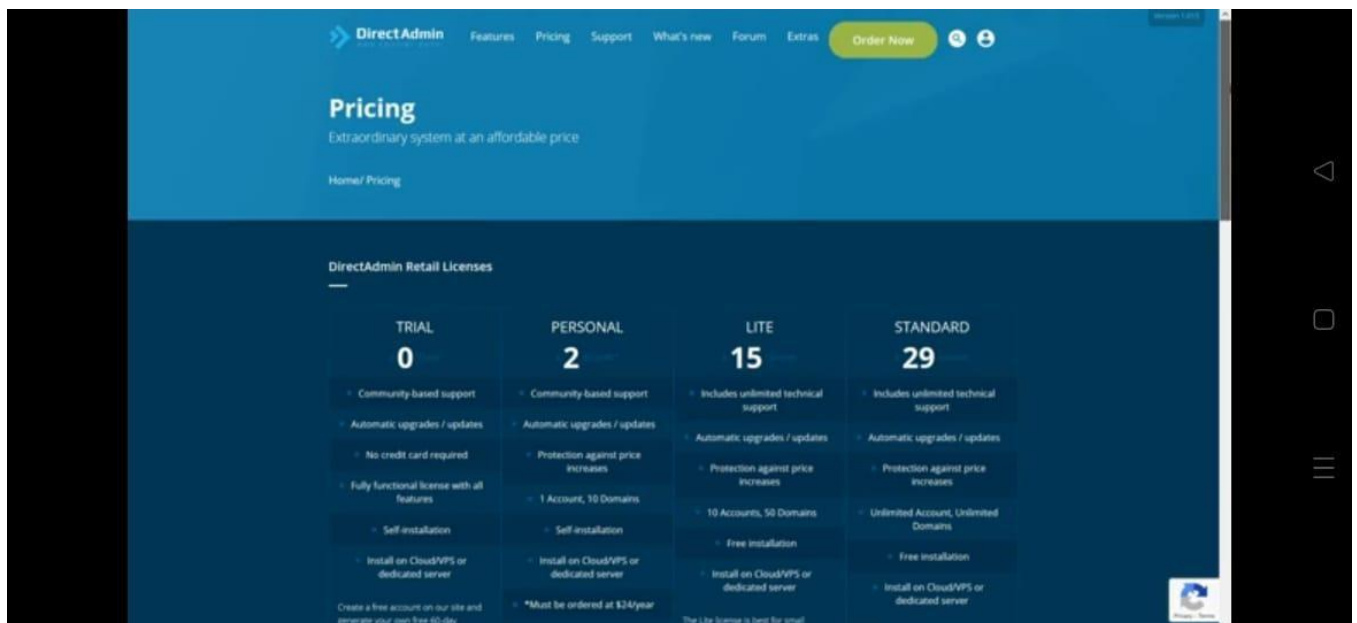

Step 4:

Step 5:

Step 6:

Step 7:

The screenshot displays the 'Shop our cPanel & WHM® Products' page. A navigation bar at the top includes links for Overview, Pricing, cPanel & WHM Features, Extensions, Customize cPanel, and Try cPanel & WHM. The main heading is 'cPanel Account Tiers'. Below this, four product tiers are listed in cards:

Tier	Price (monthly)	Description
cPanel Solo™	\$15.00	Suited for small businesses, freelancers or anyone needing just one hosting account.
Admin	\$20.00	Created for a small to mid-level agencies and businesses, application developers, and web designers only needing a few accounts.
Pro	\$30.00	Optimal for mid-level businesses and large agencies that are growing. Allows for scalability.
Premier	\$45.00	Created for data centers, enterprise level businesses, and larger web hosts.

Step 8:

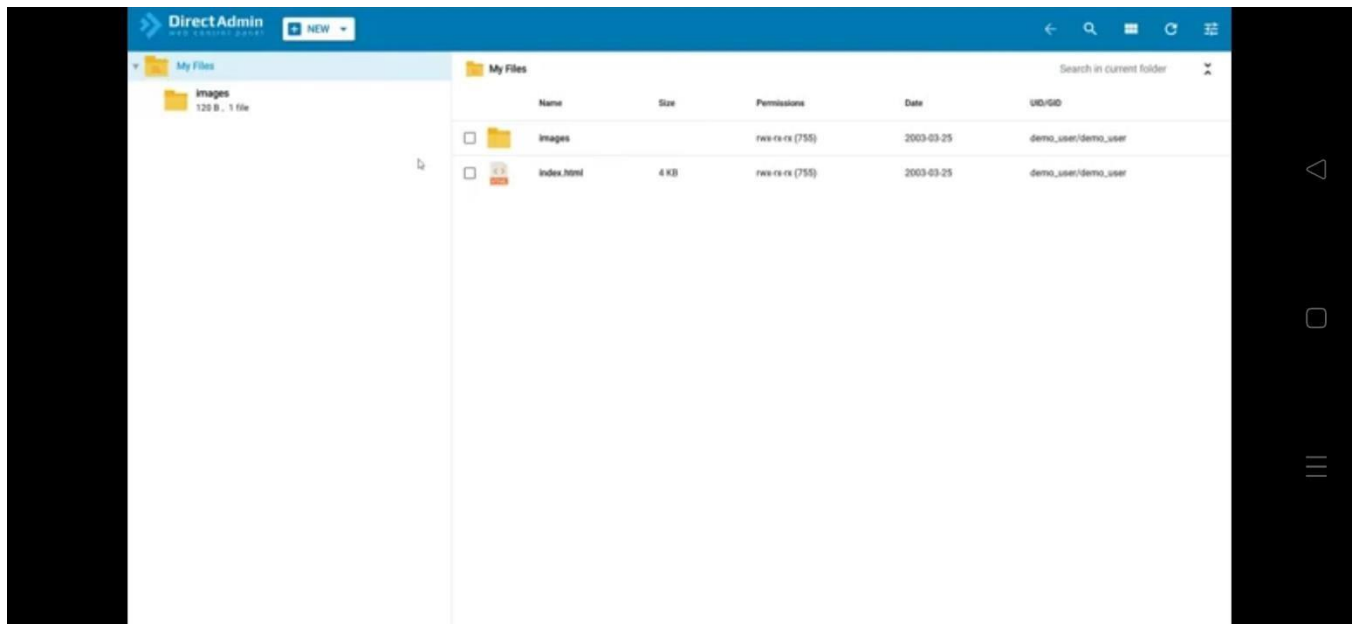

The screenshot shows the DirectAdmin web interface. The top navigation bar includes the DirectAdmin logo, a navigation menu, an 'Access Level' dropdown set to 'Admin', and a user greeting 'Hello, demo_admin'. Below the navigation bar is a row of icons for Account Manager, Server Manager, Admin Tools, System Info & Files, Extra Features, and Support & Help. The 'System Info & Files' icon is selected, opening a 'System Info' panel. This panel contains the following information:

- System Info** (with a BACK button)
- Uptime:** 10985 Days, 12 Hours and 34 Minutes
- CPUs count:** 1
- CPUs Information:**

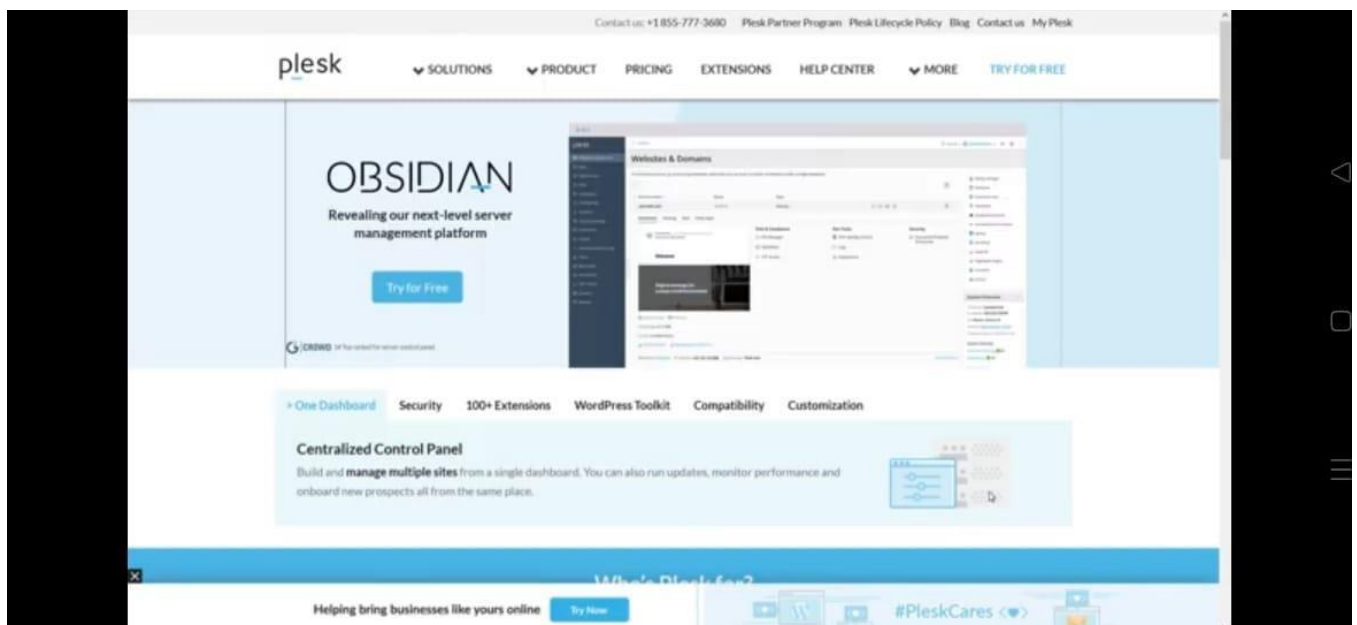

Processor Name	Vendor ID	Processor Speed (MHz)
Sperry R088	Sperry	4
- Memory Information:**

Total Memory	640 KB
Free Memory	12 KB
Available Memory	0 B
